

DESIGN YOUR OWN INVESTIGATION

Develop Your Question:

Make a Plan: Make a list below of the specific data you will need to answer the question.

Data Set	Date	Map or Graph?
Example: Sea surface height deviation	December 2015	map

Other than the data listed above, what other information (if any) will you need to answer your question?

Get the data: Use the website to download the data you will need.

Interpret the data: What does your data show? Be specific and descriptive.

Draw a Conclusion: What is the answer to your question? Use evidence and data to support your conclusion.
